A photograph of a couple relaxing in a circular hot tub on a rooftop deck. The hot tub is white with a dark, textured deck around it. The couple is seen from behind, looking out over a city and a lake. The background shows a modern building with a glass railing and a view of a city and a lake under a clear sky. The Softub logo is overlaid on the top right of the image.

SOFTUB HOT TUBS

Softubs are made for carefree relaxation and offer a break from the stresses and strains of everyday life. They soothe the body, help the mind to unwind, and offer a sanctuary from the busy day.

With a Softub, you add more luxury and enjoyment to your precious leisure time – time which will rejuvenate and re-energise you for the challenges ahead. Spoil your body with a healing and invigorating massage that can be adapted to your specific needs thanks to systematically arranged jets and a range of different settings and programs. Atmospheric underwater LED lighting will also help you to unwind, turning your spa into a pool of beautiful colours. When the experience of massage, light and colour is combined with the sweet aromas of fine fragrances your Softub will truly offer an oasis of relaxation for all the senses.

With a Softub, you can enjoy relaxing in style – anytime, anywhere you choose.

UNWIND BODY AND MIND

SOFTUB: Resort 300+, Camel

9 REASONS

Softubs combine comfort and style with excellent eco credentials and flexibility – offering you a sanctuary from the stresses and strains of everyday life.

PORTABLE

Light, easy to manoeuvre and easy to install: with a Softub, the most portable hot tub in the world, your choice of locations and possibilities is endless.

CLEAN

The automatic Softub Ozonator function provides an intensive water cleaning program. As a result, every dip is in crystal clear, high-quality water.

QUIET

Enjoy your Softub in peace and quiet! Thanks to their advanced Whisper technology, Softubs are amongst the quietest hot tubs on the market.

FLEXIBLE AND VERSATILE

For ultimate flexibility, the Softub's basin shape is designed to allow free and unhindered movement within the pool, enabling you to change your sitting or lounging position, to stretch out or cosy up, whatever mood takes you.

ENERGY-EFFICIENT

Softubs are the market leader in heat recovery technology, combining pump, motor and heating into one 'Hydromate' unit. The excess heat from the motor is recovered to heat the filtered water, reducing energy consumption to a minimum.

COMFORTABLE

Nothing can compare to a Softub's comfort and convenience. The soft but stable Polybond material provides comfort in all positions – making the pool as comfortable as a leather sofa.

WEATHER RESISTANT

Come rain or shine, heat wave or big freeze a Softub's robust Leathertex outer-casing will withstand the severest weather conditions without being affected. Softubs are built to last.

STYLISH

With its leather look, understated slimline design, modern and elegant exterior colours and practical, stylish accessories, Softub combines high quality, style and beautiful design.

SOLAR POWERED

A Softub is so energy efficient that it can even be run on solar power, be it from solar panels which feed into the grid or our specifically designed Softub solar islands. To find out more visit us on www.softubsolar.com

SOFTUB: Resort 300+, Charcoal

SOFTUB SURROUND: Chill Lounge, Charcoal

SOFTUB

THE MOST PORTABLE HOT TUB IN THE WORLD

Softubs are portable, comfortable and environmentally-friendly. Whether inside or outdoors, a Softub can transform your favourite spot into an oasis of relaxation!

Softubs are designed with leisure and luxury in mind and allow for flexibility, individuality and superior performance thanks to their weather resistance, thermal insulation and lightweight materials. The outer casings are made from 'Leathertex' – a material which gives an elegant leather look to our hot tubs whilst being durable and designed to withstand the elements.

The inner basins are made from Polybond – a highly insulating foam material which offers both first-rate structural stability and excellent comfort levels for all sitting and lounging positions. Thanks to its innovative design a Softub can offer a haven of relaxation in any location you choose.

IN ALL WEATHERS

Be it in minus temperatures, snow or ice – a dip in a heated outdoor spa is an experience for all of the senses and strengthens your body's immune system

THE POWER OF WATER

THE HEALTH SPA

WHY PUT OFF FEELING FABULOUS?

Invigorating massages, therapeutic fragrances and the soothing warmth of a Softub bring respite for body and soul. With regular use, a Softub can bring more vitality and an improved sense of well being.

The warm water encourages your blood circulation and activates your body's own natural healing powers. Back and joint problems are alleviated by hydrotherapy and the metabolism is stimulated, improving your health and well-being in general.

A soak in a hot tub helps to release endorphins, naturally reduces pain, and creates the feeling of happiness and contentment; when the body is relaxed, the mind can find it easier to unwind and worries simply fade away. The heat of a hot tub also increases the body temperature, allowing blood vessels to expand and to absorb more oxygen. Breathing becomes deeper, helping to clear sinuses and lungs, meaning your Softub can be an effective treatment for colds and asthma.

In water, the body only weighs around 30 % of its actual weight. This reduces pressure on strained muscles and injured joints. Therefore, a Softub massage does not only relieve tension – it also helps in the recovery process of overburdened body parts. The buoyancy can even be used as a treatment against chronic and rheumatic diseases.

Hot tub sessions are also recommended for non-physical conditions such as insomnia. In addition, targeted applications can be used to improve circulation and assist in the treatment of diabetes. What is more, sessions in your hot tub help to keep the skin's blood vessels and the connective tissues elastic and healthy, helping you look younger and more radiant.

GREAT RESULTS IN ALL AREAS

- 1 General relaxation, reduction of the production of stress hormones, improved sleep, alleviation of pain
- 2 Relaxation of neck and shoulders, improved circulation and better mobility
- 3 Improved heart and lung capacity, boost of the lymphatic system and improved metabolism
- 4 Strengthening, relaxation and easing of pain in spinal area, back, posterior and pelvis
- 5 Improved circulation, natural detox and regeneration of skin cells
- 6 Stimulation of immune system and vital organs (digestive system, heart, kidneys etc.)
- 7 Improved mobility and strengthening of hip, knee and ankle joints as well as tendons and ligaments

MAKE EVERY

DAY A HOLIDAY

Mini breaks, romantic weekends or family holidays – a Softub can cater for any occasion and all in the comfort of your own home! Softub – more than just a hot tub .

A Softub brings people together and is the ideal place to spend meaningful quality time with family and friends. A Softub provides a central hub for your loved ones right in the heart of family life.

No more swimming pool or spa visits with overcrowded pools and worries about forgotten towels! A Softub creates a social event that can be glamorous and luxurious, soothing and peaceful or sparkling and lively, all in the comfort of your own home.

With a Softub you and your loved ones can enjoy quality time together whenever the mood takes you.

A PARADISE FOR
FAMILY AND FRIENDS

THE ECO TUB

ENJOYING RESPONSIBLY AND SUSTAINABLY

The preservation and protection of our environment should be a key factor in any current and future decisions. Softub hot tubs are the market leader in energy efficient and environmentally friendly technologies.

Softub engineers achieved a breakthrough in hot tub technology when they developed the Softub Hydromate. The heart of a Softub combines the hot tub's pump, motor and heating into one unit. Thanks to the clever arrangement of these technical components, the pool's water can be heated by the motor's excess heat. This environmentally-friendly heat recycling process reduces energy consumption to less than a microwave needs to heat a meal.

In addition, the motor's innovative Whisper technology reduces the pump's decibel output to nothing more than a gentle murmur thus reducing a Softub's impact on its environment and its overall footprint even further.

An intelligent filtration system minimises the need for sanitising chemicals and minimises general maintenance. Every Softub's Ozonator filters the tub's water automatically twice a day, using the oxidation effect of the ozone. As a result, the water isn't just hygienically clean but also stays clear for longer reducing the frequency with which the water needs to be replaced – saving water and the planet. (We recommend that customers change their water 3-4 times a year.)

Softubs are durable and built to last. In spite of minimal maintenance the life expectancy of a Softub is 10 years or more. Faults can usually be fixed with simple repairs and without expensive call out charges as the hydromate can simply be sent through the post.

Finally, should you decide to trade in your old Softub against a new model then you not only save money but help us to save the environment as we ensure that your old tub is reduced, reused or recycled appropriately.

TESTIMONIALS

THIS IS WHAT OUR CUSTOMERS SAY ABOUT SOFTUB

We value your opinion and welcome your feedback, whether you are sharing happy memories and encouraging us in what we are doing or whether your feedback helps us to become even better.

We bought our hot tub last August at the Anglesey Show in North Wales and it has been such a brilliant move. Encroaching old age, aching limbs and the best place to discuss life, the universe and everything else!! It has ticked all the boxes and more. The service throughout was exceptional with professional sales, first class installation and cracking back-up when needed.

Thank you and we have recommended the softub company to anyone who will stay still long enough.

Regards Ally Hargreaves
 p.s. It has done my back problems a remarkable amount of good and kept me mobile.

„My experience with Softub UK has been extraordinary. Since buying my tub in the spring of 2013, the service

I have received from them has been second to none. They met all the timescales we agreed, were extremely professional and responsive and, in my opinion, went way beyond what I would expect from a firm supplying leisure items such as these. I was a complete novice about hot tubs and they supported me really well and never made me feel as if I was asking for their help and advice too much.

As soon as they introduced Clearwater in September 2013 I was keen to try it in order to make the sanitation process as easy as possible so I ordered a pack from them. I had a major problem at first as, like most men, I did not read the instructions resulting in a tub full of cloudy water. With the help of Daniela (who is fantastic!) we quickly got it sorted out and I now have pure, sparkling water in my tub with hardly any effort on my part.

JOHN DEADMAN

We're absolutely delighted with our Softub. The staff at Softub UK made the purchase really easy and Joe was superb regarding the installation. He even came along the week before to make sure we had everything ready. Then he was so meticulous about installing and filling the tub. The only after-sales service we have needed was a query about how the thermostat worked but that was answered promptly and clearly.

Since then we've been in the tub several times every week. It's a great way to relax after a stressful day or a long walk. And our friends love it too - they always want to finish walks at our house now!

CATH & DAVID, PEAK DISTRICT

TECHNICAL FEATURES

Softub hot tubs use innovative and intelligent technology that ensures an eco friendly and energy efficient approach to hot tub enjoyment. Integrated jets and LEDs support the effects of hydrotherapy.

SOFTUB: **Legend 220, Almond**
SOFTUB SURROUND: **Polyrattan, Mocca**

1 WHISPER-HYDROMATE

The 'Hydromate' combines the hot tub's pump, motor and heating into one unit. Thanks to the clever arrangement of these technical components, the pool's water can be heated by the motor's excess heat. This environmentally-friendly process reduces power consumption to a minimum while innovative Whisper™ Technology reduces the pump's decibel output to nothing more than a gentle murmur making a Softub one of the quietest hot tubs on the market

4 CONTROL PANEL

The user friendly control panel allows for the simple adjustment of water temperature, massage jets or light settings - all at the touch of a button.

2 OZONATOR

Every Softub's Ozonator filters the tub's water automatically twice a day. Using the oxidation effect of the ozone, the water isn't just hygienically clean as a result - it is also crystal clear. As a consequence, the need to add water treatment is greatly reduced and general maintenance minimised. A replaceable cartridge filter further adds to Softub's high standards and low maintenance.

5 HYDROJETS

The specialised massage jets in a Softub can be activated at the touch of a button and adjusted to reach specific body parts and muscle groups. The adjustable jetflow ensures an individual massage to suit your needs.

3 SMARTCHIP™

Intelligent technology: with the Smartchip, Softub hot tubs overcome any issues which might arise from network-associated voltage fluctuations. If the chip registers a surge, all electronic components within the hot tub are automatically switched off. This protects the equipment from all risks associated with power cuts.

6 LED

An important part of the Softub's hydrotherapy is the addition of underwater LED lighting. 10 different colours and hues cater for any mood or occasion.

1 roll your Softub

2 connect your Softub

3 prepare your Softub

SOFTUB: **Legend 220, Almond**
SOFTUB SURROUND: **Polyrattan, Mocca**

SET UP IN THREE SIMPLE STEPS

Easy to manoeuvre, simple to install – your new haven of relaxation is only a few steps away

1 LOCATION

Your Softub will be delivered to your home in a Softub transportation box, which can easily be rolled to your installation site of choice.

2 SET UP

Once basin and hydromate are in situ they simply need to be connected.

3 INSTALLATION

The Softub can be filled with a garden hose. Then all that is left to do is to plug the tub into a standard household socket, place the lid on top of the tub and wait for the water to reach the desired temperature.

JUST ADD WATER AND ENJOY YOUR OASIS OF RELAXATION

INFOBOX

SAFETY-TESTED

CE + TÜV/GS

After successfully passing all relevant EU standards compliance tests, exported Softub hot tubs (240 volt, 50 Hz) have been awarded a CE certificate. The spas have also been awarded an ANSI/NSPI-6 1999 rating: the 'American National Standard for Portable Spas'.

The Softub exhaust system is also ANSI/APSP-7 compliant. The entire system is, of course, also fully TÜV/GS-tested – your guarantee for maximum safety.
